INTRODUCTION

This is the third edition of the Compendium of University Statistics. As did the preceding issues, it aims to serve as a central reference source and to bring together in one place and in summary form some of the basic statistics on the activities and resources of Canada's universities. Its contents have been slightly expanded and now include information on community college and university participation rates and on the expenditures of the three granting councils.

Currently available publications, mostly from Statistics Canada, have been used as sources of information; in a few instances, however, as yet unpublished data provided by Statistics Canada have been included. We are most grateful to this agency and, particularly, to its Education, Culture and Tourism Division for their generous assistance and for allowing us freely to use their publications.

The Compendium consists of a diagram, which shows some of the major participants in the university systems across the country, and 31 statistical tables, arranged in nine sections. The first of these sections presents information of a general nature pertaining to all levels of education (enrolments in and graduates from schools, colleges and universities; participation rates) and to topics such as French immersion, level of schooling of the population and unemployment rates. The next seven sections focus on the universities and deal successively with enrolments, degrees, tuition fees, faculty, research, finances and libraries. The ninth section is concerned only with those institutions that are members of AUCC and gives some basic data to indicate the size of their operations. A briefly annotated bibliography of some of the more relevant education and science publications of Statistics Canada concludes the Compendium.

Explanatory footnotes to the tables have been kept to a minimum. If uncertain as to the exact nature of the data provided, the reader is advised to consult the source documents identified under each table.

The data in the section on enrolments refer only to degree-granting institutions; they do not include students enrolled in university transfer programs at colleges in Quebec, Alberta and British Columbia.

The coverage of the tables in Section 5 is limited to full-time faculty, since no national data on part-time teachers are available. More-

INTRODUCTION

Voici la troisième édition du Compendium de statistique concernant les universités. Comme les précédentes, elle vise à servir de source centrale de consultation et à réunir en une seule brochure et de façon sommaire certaines des statistiques de base sur les activités et les ressources des universités du Canada. Son contenu a été légèrement augmenté et comprend maintenant des données sur le taux de participation aux collèges communautaires et aux universités et sur les dépenses des trois conseils subventionnaires.

Des publications courantes, de Statistique Canada pour la plupart, nous ont servi de source de renseignement; dans quelques cas, nous avons aussi utilisé des données non encore publiées que nous a fournies Statistique Canada. Nous sommes très reconnaissants à cet organisme, et plus particulièrement à sa Division de l'éducation, de la culture et du tourisme, de leur généreuse assistance et de la permission de puiser librement dans leurs publications.

Le Compendium comprend un diagramme montrant certains des principaux éléments des systèmes universitaires du pays et 31 tableaux statistiques divisés en neuf sections. La première section renferme des renseignements généraux concernant tous les niveaux d'enseignement (inscriptions et diplômés des écoles, collèges et universités; taux de participation) et portant sur des points tels que l'immersion en français, le niveau de scolarité de la population et le taux de chômage. Les sept sections suivantes portent sur les universités et, successivement, sur les inscriptions, les grades, les frais de scolarité, le corps professoral, la recherche, les finances et les bibliothèques. La neuvième section ne s'intéresse qu'aux établissements membres de l'AUCC et indique au moyen de données de base l'ampleur de leurs activités. Une bibliographie brièvement annotée de certaines des publications les plus pertinentes de Statistique Canada dans les domaines de l'éducation et des sciences complète le Compendium.

Les notes explicatives en bas de page ont été réduites au minimum. En cas de doute quant à la nature exacte des données, le lecteur est prié de consulter les sources indiquées au bas de chaque tableau.

A la section des inscriptions, les données s'appliquent uniquement aux établissements qui confèrent des grades; elles ne tiennent pas compte des étudiants des collèges du Québec, de l'Alberta et de la Colombie-Britannique qui sont inscrits à des programmes de passage à l'université.

Les tableaux de la section 5 ne portent que sur les professeurs à temps plein, étant donné qu'on ne dispose pour l'instant d'aucune donnée à l'échelle nationale sur les

over, most of these tables exclude Quebec by lack of data for the year under review.

It should be noted that tables 7.1 and 7.3 only show the direct support for higher education provided by the federal government. They do not show the indirect federal contributions in support of higher education which are provided to the provinces under the Federal-Provincial Fiscal Arrangements and Established Programs Financing Act of 1977 and which are estimated at around \$4.5 billion in 1985-1986.

Due to rounding, the figures in some of the tables do not add up to the indicated total.

professeurs à temps partiel. De plus, la plupart de ces tableaux excluent le Québec, faute de données pour l'année qui fait l'objet de l'étude.

Il y a lieu de mentionner que les tableaux 7.1 and 7.3 ne font état que du soutien direct du gouvernement fédéral à l'enseignement supérieur. Ils ne montrent pas ses contributions indirectes, versées aux provinces en vertu de la loi de 1977 sur les accords fiscaux entre le gouvernement fédéral et les provinces et sur le financement des programmes établis, aide qui serait de l'ordre de \$4.5 milliards en 1985-1986.

Pour avoir été arrondis, les chiffres de certains tableaux ne donnent pas le total indiqué.
